ABSICHERUNG

Safe AI for Automated Driving

October 11 2021, ITS World Congress

KI Absicherung

Lydia Gauerhof, Robert Bosch GmbH

1

Project vision and goals

Making the safety of AI-based
function modules for highly
automated driving verifiable

KI ABSICHERUNG

Safe AI for Automated Driving

Pedestrian detection

Challenge

AI Land

Safe, trustworthy driving function

Consensus in industry and academia on the Safety of AI

2

Methodological and conceptual
approach

KI

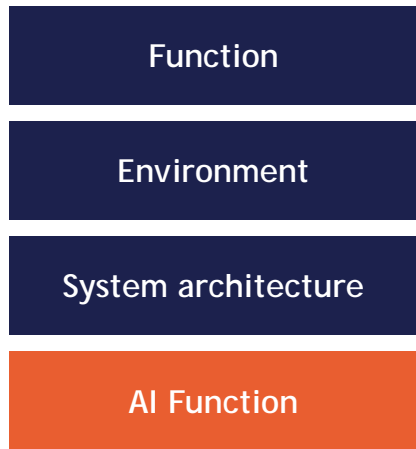

ABSICHERUNG

Safe AI for Automated Driving

Provide the AI functions for pedestrian detection

AI Function-Pedestrian detection

Semantic Segmentation

2D Bounding Box Detection

Instance Segmentation

3D Bounding Box Detection

3D Pose estimation

Safe AI for Automated Driving

- »» Provide the AI functions for pedestrian detection
- »» Generate synthetic data

ML-Lifecycle-Validation data

KI

ABSICHERUNG

Safe AI for Automated Driving

- »» Provide the AI functions for pedestrian detection
- »» Generate synthetic data
- »» Develop methods and measures

Identify, Measure and Counteract „DNN-specific Safety Concerns“

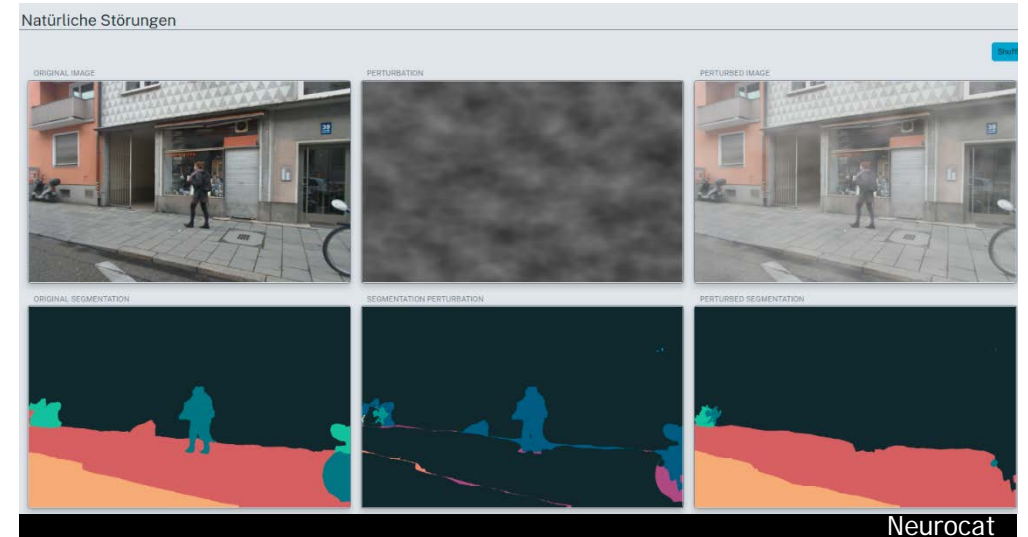

DNN-specific safety concern:

- False positive / negative: Pedestrian detection is incorrect resp. not robust enough

Method:

- Assessment of uncertainty: Stochastic evaluation of a multitude of model variations (Monte Carlo Dropout)

DNN-specific safety concern:

- Adversarial error: leads to overlooking (false negative)

Method:

- Systematic analysis of adversarial errors
- Methods to evaluate adversarial resilience
- Counter mechanisms during training or operation

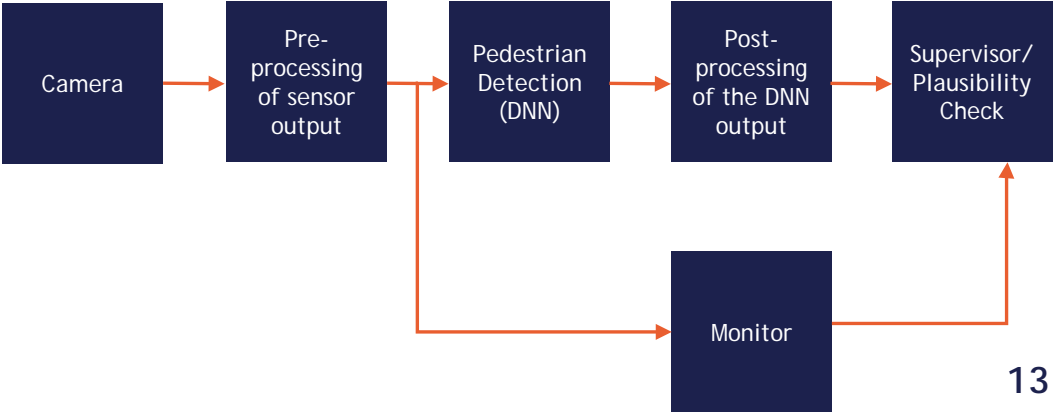

KI

ABSICHERUNG

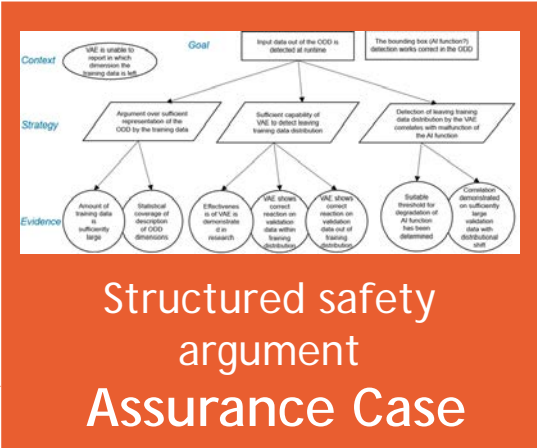

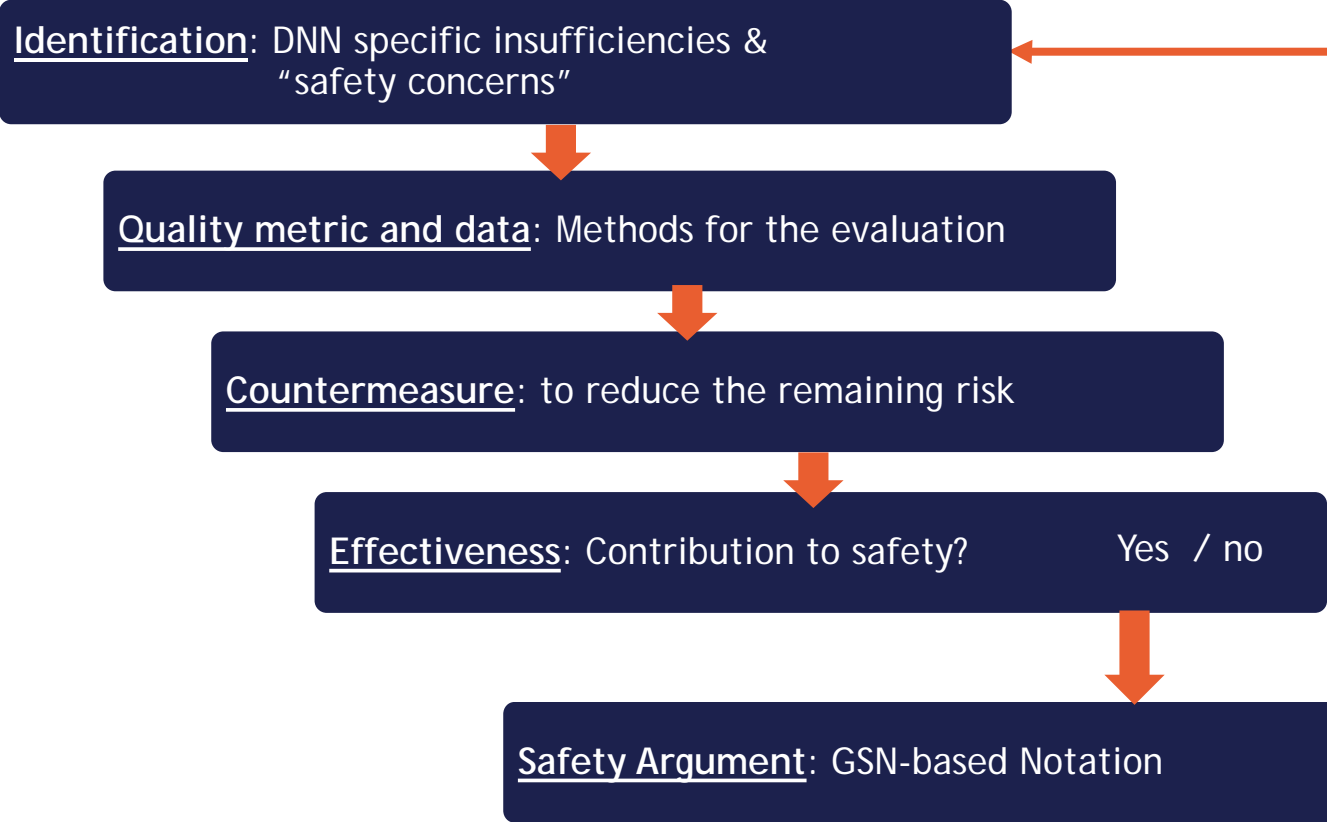

Safe AI for Automated Driving

- »» Provide the AI functions for pedestrian detection
- »» Generate synthetic data
- »» Develop methods and measures
- »» Establish an overall safety argument for the AI function

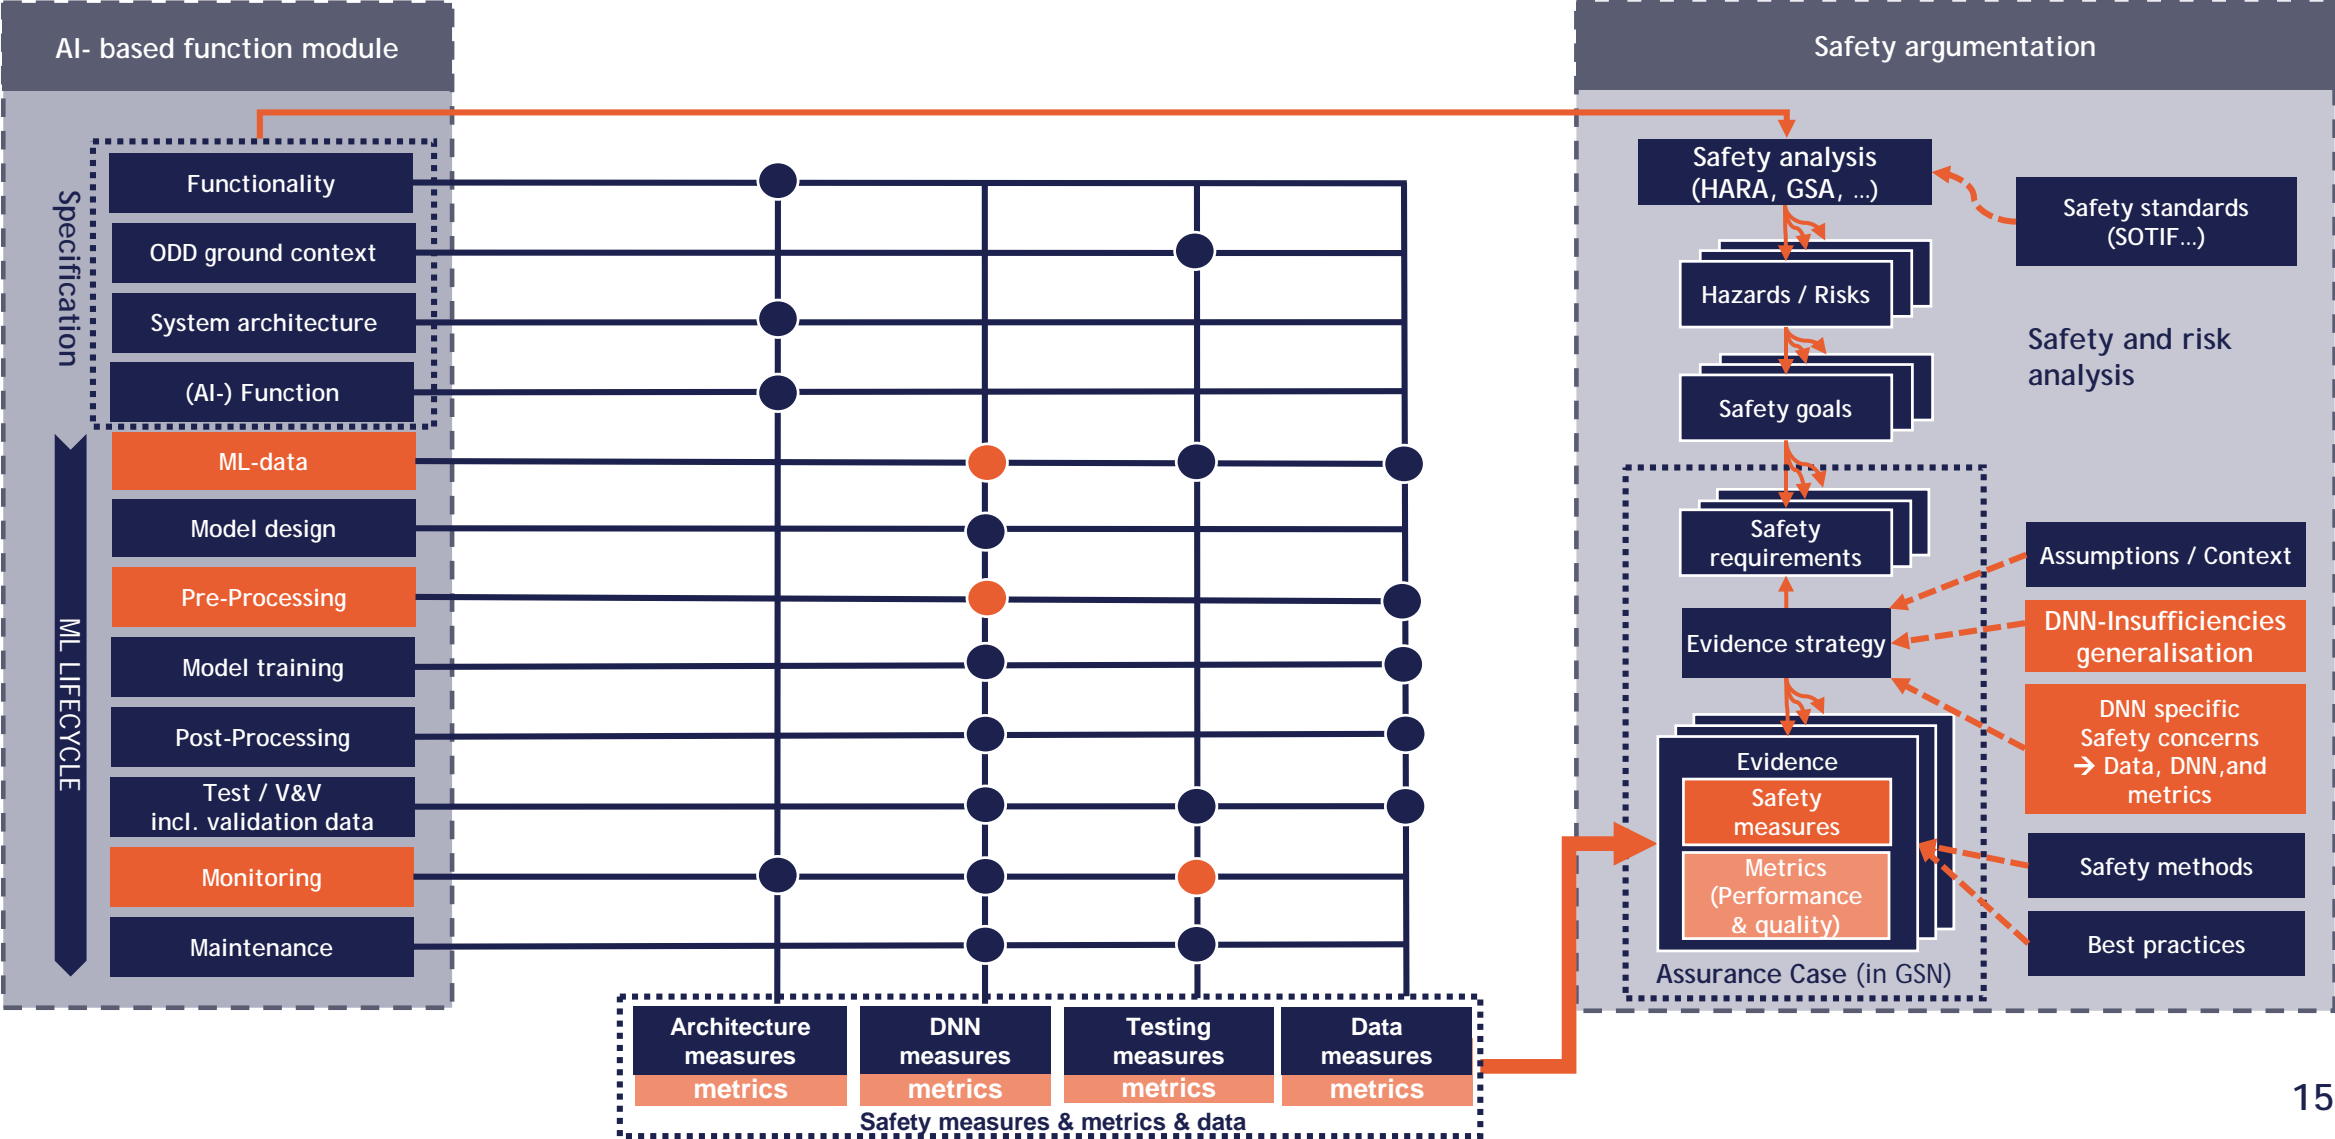

Specification

Our Approach: Establishment of a Holistic Safety strategy

AI Specific Evidence-Based Safety Argumentation

KI

ABSICHERUNG

Safe AI for Automated Driving

- »» Provide the AI functions for pedestrian detection
- »» Generate synthetic data
- »» Develop methods and measures
- »» Establish an overall safety argument for the AI function
- »» Communicate the results
